Technical Data Sheet

Hot Stamping Foil for Textile(Screen print type)

- ♠ Temperature : 150~160°C
- ♠ Lead time : 6~10 seconds
- ♠ Freezing time : 10 seconds or fully cooling down

1. Coating adhesive with screenprinting mold on t-shirt
2. Put Stamping foil on No.1 process.
3. Stamping foil laminate with adhesive coated T-shirt.
4. Freezing No.3 process around 10 second or fully cooling down. Then release PET film

※ Stay away from heat above 90°C after finishing the work, since high heat might cause color migration. If you need to iron, please cover it with thin fabric.
